NEXT GEN REMOTE
WORKFORCE SOLUTIONS

Deskless productivity solutions that enable any company in any industry to schedule, manage, communicate and engage their mobile workforce

Built by Dispatch Dynamics, NextGenRemote combines digital technology with cloud-based services to provide commercial off-the-shelf software with a high technology readiness. Access to actionable, trusted data is provided with remote access to interactive scheduling, instant communication and real-time employee data management. Software merges digital dispatch with virtual hiring... provides new ways to mitigate the risks associated with severe weather, power outages, COVID-19, flooding, earthquakes and escalating gasoline prices.

NextGen Remote provides Multi-Tenant applications: each with a 1) mobile website that interfaces with 2) a robust dispatch/data management application... includes text messaging, security and safety modules, point-of-hire certification; training, license and compliance validation.

- **Workers Self-Schedule.** Password protected website displays available jobs posted by employer. Workers self-schedule availability to work on a specific job/project from their mobile phones; receives text message confirmation. Optional clock-out function available upon request.

- **Remote Hiring for Deskless Workers.** Using Smart Scheduler employer hires or denies jobs for deskless workers who have indicated their availability to work. Scheduler tracks training, licenses and certification at point-of-hire. Sends text message to workers and managers if training/licenses or certification do not meet job criteria.

- **Virtual Office with Remote Login.** Using a computer, laptop or tablet from any location, employers or admins confirm hiring, reschedule jobs or send text messages. Automated text messages sent to workers confirm all hiring transactions.

- **Certifications, Licenses, Training, Skills.** Provides employers or admins with a searchable database to identify workers' certification, licenses, training and skills. At point-of-hire Smart-Scheduler sends text message to employer if worker's certifications, licenses, skills or training to not meet job requirements.

- **Mass Text Messaging Tools.** Smart Scheduler provides administrators or employers with VOIP and five text messaging tools to contact workers about jobs, schedule, dispatch or any emergency.

NextGen Remote is table driven with no hard coding. It can be translated into any language. Components can be reconfigured, removed or rebranded to serve any line of business. Dispatch Dynamics signature software, *Harbor Watch Maritime Information System* has a seven year history of proven performance with ZERO downtime.

FAST FACTS

Designed for users with minimal computer skills. Dispatchers can be trained in 90 minutes. End-users require no training.

100% web-based. No installation, no costly IT support, no software maintenance.

Triple Redundant Backup. User data is safe, in the cloud or on the ground.

No Power. No Problem! Use a laptop with a mobile hot spot for internet access. Rapid Dispatch will schedule workers or send text messages from any remote location.

Roll-based logins provide Administrators with the tools to allow full or limited access to Rapid Dispatch functionality and scheduling data.

Work History Web Page with Monthly Calendar documents each worker's job, start-time, employer and job site. All text messages sent for last 30 days also documented. Password protected access provided on interactive website.

Dispatch Data Exported to any Payroll or Time-and-attendance application. Dispatch Orders display worker's name, color photo, mobile phone number, ID#, job, worksite and hiring entity.

Job Replacements scheduled, dispatched and archived in Rapid Dispatch database same speed and accuracy as initial worker dispatch.

Password-protected portal on company website displays all jobs available in scheduled locations. Names of workers dispatched to each location displayed in real time.

Flexible filters, mouse overs and drop-down menus allow employers to sort and qualify workers by trade, years of experience, licenses, certifications and training.

Instant Text messages sent to single user or pre-determined list, regardless of the number of recipients.

Custom Reports. Rapid Dispatch provides 21 automated reports archived in the application as PDF, .csv or Excel files. A custom report writing module is available.

SmartScheduler dispatches workers to any location in real-time using one of the following dispatch methods:

  a) drag/drop

  b) optical card readers

  c) automated dispatch

Pricing & Availability: Commercial off-the-shelf software ensures rapid deployment of each customer application, rather than the commissioning of custom-made solutions.

1) **Monthly SaaS fees** plus one-time set-up and data integration.

2) **Perpetual License** fee plus one-time setup and data integration
